

CURRICULUM VITAE
of
Massimo Ceraolo

He took his Ms Degree in Electrical Engineering from the University of Pisa, with honours, in 1985.

He is full professor of Electric Power Systems since 2002, and teaches *Electric Power Systems* and *Electric and Hybrid Vehicles* at the University of Pisa and Naval Electric Systems at the Accademia Navale of Livorno.

He is author or co-author of around 160 scientific papers the large part of which are either International Conference or International Journal papers.

In 2014 he has authored the IEEE/Wiley book “Fundamentals of Electric Power Engineering – From Electromagnetics to Power Systems)”

His main fields of interest are Electrochemical storage systems, Electric and hybrid vehicles, Guided electrified transportation systems.
